About this book

This book is a five-day practice course in addition. It starts with the smallest sums a child can do - $1 + 1$, $2 + 3$ - and works up in size and difficulty until the last pages are four-digit column sums.

The skills are in the order they are usually taught. Single-digit sums come first, then two-digit sums that do not need carrying, then sums that do, and then the mixed sums where the child has to work out for themselves whether a column needs carrying. Every skill gets five pages, one for each day of the week.

How to use this book

- One page a day. Every skill has five pages: Monday to Friday. A short, focused page is worth more than a long one, and a page done every day beats one long session at the weekend.
- The Date field is for the day the page was done, so a parent or a teacher can see at a glance how the week went.
- The answer book has the same pages with the answers printed under the line. Use it to mark the work, not to copy it.
- If a page is too hard, leave it and come back to it the next day. If it is too easy, the harder version of that skill is further on in the book.

Every sheet in this book comes from mathcardo.com, where thousands of free printable worksheets and three maths games for every worksheet are waiting.
