About this book

This book is a five-day practice course in multiplication. It starts with the smallest products - 2×1 , 3×2 - and works up through two-digit, three-digit and four-digit multiplication, all the way to long multiplication with a four-digit answer.

The skills are in the order they are usually taught. Single-digit products come first, then the easier two-digit by one-digit products, where there is only one step to work out, and the harder ones, where the partial products have to be added together. The same pattern is repeated for three-digit and four-digit numbers. Every skill gets five pages, one for each day of the week.

How to use this book

- One page a day. Every skill has five pages: Monday to Friday. A short, focused page is worth more than a long one, and a page done every day beats one long session at the weekend.
- The Date field is for the day the page was done, so a parent or a teacher can see at a glance how the week went.
- The answer book has the same pages with the answers printed under the line. Use it to mark the work, not to copy it.
- If a page is too hard, leave it and come back to it the next day. If it is too easy, the harder version of that skill is further on in the book.

Every sheet in this book comes from mathcardo.com, where thousands of free printable worksheets and three maths games for every worksheet are waiting.
